PROFESSIONAL SUMMARY

Data Engineer with proven hands-on expertise across healthcare technology, enterprise business intelligence, and fullstack platforms. Specialized in architecting automated ETL/ELT pipelines, distributed computing with Apache Spark & PySpark, and workflow orchestration using Apache Airflow on Google Cloud Platform (GCP). Strong background in relational schema modeling, advanced SQL optimization, and delivering reliable data marts for executive Power BI and Tableau analytics dashboards.

TECHNICAL SKILLS

Data Engineering:	Apache Spark, PySpark, Apache Airflow, ETL/ELT Pipelines, Batch Processing	Cloud Platforms (GCP):	BigQuery, Cloud Storage (GCS), Cloud Functions, IAM & Security
Databases & SQL:	PostgreSQL, MySQL, SQL Optimization, Star/Snowflake Schema, Indexing	BI & Visualization:	Power BI (DAX, Modeling), Tableau, Metabase
Languages & Scripting:	Python, SQL (Advanced Analytical), TypeScript, JavaScript, Bash / Shell	DevOps & Tooling:	Docker, Git & GitHub, Postman, Linux / Ubuntu, RESTful APIs, CI/CD

PROFESSIONAL EXPERIENCE

Data Engineer — Greenline Synergy Co. Ltd Mar 2026 – Present | Bangkok, Thailand

- Architected and managed distributed ETL/ELT data pipelines using Apache Airflow and Google Cloud Platform (GCP).
- Engineered large-scale in-memory data transformations with Apache Spark & PySpark for enterprise healthcare datasets.
- Designed dimensional data marts and automated ingestion pipelines feeding real-time dashboards in Power BI.
- Optimized BigQuery analytical queries, partitioning, and schemas to maximize throughput, ensure data reliability, and reduce cloud costs.

Business Intelligence Developer — Principle Healthcare Co. Ltd Jul2024–Sep2025 | Bangkok, Thailand

- Developed dynamic reporting systems and executive hospital monitoring dashboards using Tableau.
- Automated data extraction and ingestion pipelines with Python for accurate and timely healthcare data synchronization.
- Refactored and tuned complex analytical SQL queries, indexing, and data models to significantly improve query performance.

Fullstack Developer — Greenline Synergy Co. Ltd Oct2023–Jul2024 | Bangkok, Thailand

- Built high-performance RESTful APIs and modern React front-end features for CRM and healthcare insurance management platforms.
- Designed relational database schemas and data integration points across internal hospital microservices and third-party systems.

Back-End Developer — Conicle Co. Ltd Jan 2023 – Oct 2023 | Bangkok, Thailand

- Designed, documented, and maintained scalable RESTful services using Django for EdTech platforms.
- Tuned relational database schemas and complex queries to ensure low-latency data access and system reliability.

EDUCATION

Bachelor of Science in Computer Science — Burapha University 2016 – 2020 | Chonburi, Thailand
